

Merry Christmas

A New Beginning's Foster-Adopt program is a unique program as we help the most vulnerable children across the United States find forever families. 115,000 children are in the foster-care system who will NEVER reunite with their biological families. They live in foster care homes waiting to be adopted. That's who we serve. Once we find homes for them, we are committed to permanency by educating our families and guiding them through transition and providing post adoption services to both families and the youth adoptees. Our programs are only partially supported by program fees and contract work. Other services such as the YANA program (Youth adoptee support program) and additional education are dependent on grants, community partners and generous contributors. Thank you in advance for considering support.
